DEON AZURE Active Directory Application Registration

App registration process

Required permissions

App registration process

The app registration process (Admin consent) can be done by a person in your organisation with admin privileges for your Azure AD:

1. Go to https://app.deon.cloud and choose "Register" at the top right of the site.
2. Sign in with your *Work or school account* and give admin approval.

This automatically creates and configures the enterprise app registration.

Required permissions

The following delegated permissions are required:

- openid
- profile
- email
