

DEON on touchscreens

Operating DEON on a touch display is very simple:

Panning (move your viewport):

One finger move.

Zooming:

Two fingers pinch zoom.

Moving items:

Touch the item once to select it. Then touch and drag it to move it.

Selecting multiple items:

Touch and hold (longpress) with one finger, then move the finger to do a selectionframe across the items.

Editing text:

Touch the textitem twice (doubletap) to bring it to editmode. Use an onscreen keyboard or an external keyboard.

Scribble:

Simply use a digital pen. DEON will automatically switch to the scribble tool. Pressure sensitivity is also supported if your hardware supports it.

Show mini menu:

Touch and hold (longpress) with one finger somewhere inside the workspace for a few seconds.
